

Please Turn Engine Off

**Reduce Pollution
and Save Money!**

Place this sticker in a visible location on vehicle dashboard. Surface must be cleaned prior to application.

Unnecessary idling wastes fuel, costs money, and pollutes the air. Turn off the engine if you expect to wait more than 10 seconds and don't start the car until you are ready to go. Keep winter warm-ups brief (1 to 3 minutes) and follow manufacturer's guidelines for proper warm-up procedures.
